

DRIVING INSTRUCTIONS

You will be given the OK to enter the START area. The Starter/Timer will then tell you when to mount the lift truck. You can then start the motor, adjust forks, engage transmission, & release parking brake. The starter will ask "Are you ready to drive?" You will indicate YES or NO. If YES, the starter will check if your seat belt is secured. If not fastened, you will be reminded to secure it. (You will lose points). You may then start when you are ready. Timing will begin when the forks cross the START/FINISH line.

Drive FORWARD to "On The Mark" - LOAD #1 - & move all pallets from one position to the other.

Drive FORWARD, through the cones, to "Truck On" - LOAD #2. This prop simulates a trailer. Load the top 3 pallets. You will drive backward until the steering axle clears the white line. Go forward & unload the pallets in the opposite position. Back out.

Driving FORWARD or BACKWARD, go to - LOAD #3 - at "Dizzy". Load only the barrel pallet. Drive BACKWARD into "Dizzy". Each time you enter the circle, you must drive around the center pilon before you exit the circle. Unload the barrel pallet.

Drive FORWARD or BACKWARD, around the cones, to "Rack Um". LOAD #4 - Load all pallets from the top tier, drive FORWARD to the opposite side of storage rack and unload pallets on the lower tier.

Drive FORWARD to "On The Mark" - LOAD #5 - and move all pallets from one position to the other.

Return BACKWARD to "Rack Um" - LOAD #6 - and load the 2nd load from the lower tier. Then drive BACKWARD to opposite side of storage rack and unload pallets on the top tier.

Drive BACKWARD, through cones, to FINISH area. Drive BACKWARD into START/FINISH area.

Timing will stop when the following are completed: You must squarely park within the START/FINISH area, properly lower forks and engage parking brake.
